

Are you doing enough to equip your organisation to respond in the event of a cyber attack?

CYBERATTACK!

An immersive group training experience to develop your teams' understanding of the organisational-wide impact of a cyber attack

The IT team at Trojan Horse Adventures theme park are worried. They've been working hard with Sales and Operations to launch a brand new vertical drop ride 'MakesYouWannaCry' in time for summer. A recent DDOS attack and media reports of a cyber incident in the US with one of their core systems suppliers has got them spooked. And now, there's something wrong with the website...

SECURING YOUR HARDWARE, SOFTWARE AND WETWARE

Explore vulnerabilities and attack vectors from every angle – are you cyber secure?

CYBER CRISIS MANAGEMENT

Deepen your understanding of what's involved in responding to a cyber attack – who, what, why, when, where

TEAMWORK UNDER PRESSURE

Practice company wide collaboration, focussing on teamwork, communications, and problem solving.

LEADERSHIP

Understand organisational context – why and how your culture and structure impacts your capability to respond to a security incident.
